

NL 1

- thinking, interpreting long term/short term perspectives

farmers: 10-20 yrs

policy makers: 50-100 yrs - climate

nat. man organisation:

different measures

- prov. has developed new programmes

* measures to be taken by farmers

* request of farmers to monitor water quality

* weirs,

* pilot area on crop rotation

- monitoring water $\rightarrow$ many parameters

PLANS

SE1 - rewet area. baseline measurement
pay attention to water quality

GE3 - find funding for implem. measures

- concept of bearing capacity of a region

A Blue Transition is a people transition

The world isn't a set of spreadsheets and models. Not everything is rational

↳ We really need

- stories
- experimental space
- guts and trust
- our regulations don't fit to solve the problems we're facing
- trial and error
- flexibility
